

eTERA T780

Mobile Network
Radio Device

The eTera T780 is a rugged, compact push-to-talk over cellular radio which allows users to communicate instantly over wide areas using both Wi-Fi and cellular (4G/LTE) networks.

Due to its rugged nature, it's the perfect device for any type of working environment, from mining and construction, to security and various other industries.

TOUGH DESIGN & USER-FRIENDLY
